Shape, pigment and texture are the three fundamental elements that define surfaces. Together, they create unique sensory experiences that manifest in the look, touch and in every detail. Shapes establish the structure and silhouette of surfaces. Pigments add color and personality, while textures provide a unique tactile feel.

The 2025 Castelatto collection explores the combinations of these three elements, creating surfaces that express the personality and originality of architectural concrete design.

CRYSTALLI

F L O O R

It presents floors, edges and accessories for swimming pools, sophisticated indoor and outdoor areas, created through the combination of exclusive natural pebbles, carefully selected and incorporated into the concrete. Through the blasting process, the pebbles are revealed, creating a unique visual effect inspired by the crystals of rocks.

ETRUSCO

FLOOR

The Etruscans, a mysterious people who flourished in ancient Italy, leaving a legacy of art, architecture and culture that inspired us to create the acclaimed Etruscan Castélatto line. This line presents the effect of natural wear caused by the action of time on Greek and Italian marbles. Its singular and uneven texture transitions from rustic to contemporary, presenting a complete range for application on floors, walls, edges and accessories for swimming pools, outdoor and indoor areas.

NEX BLOC

PERFORATED BRICK

The perforated bricks are an icon of Brazilian modernist architecture, harmonizing form and functionality to create fresh and airy environments in Brazil's tropical climate. In addition to promoting natural ventilation, these elements also generate unique aesthetic and lighting effects. Inspired by Conjunto Nacional, a landmark of Brazilian modernist architecture, Nex Bloc is a key piece of the Nexus collection, the result of an innovative partnership between the brands Deca, Portinari, Duratex, Castelatto and Ceusa.

COLONNA
PERFORATED BRICK

Inspired by Greek columns, fundamental elements of Ancient Greece that continue to inspire contemporary architecture and design, the Colonna line features pieces that create unique volumetric and movement effects. With a subtle and distorted look, this coating combines the functional benefits of openwork elements with a sophisticated design, offering colors and textures inspired by the Grezzo and Etruscan collections. In addition, the Colonna line offers versatility of application, being able to be used as a perforated brick or as a wall covering.

LUCCE MOSAIC

COATING

Luce is an inspiration derived from the Italian word "luce", which evokes light, brightness, luxury and grandeur. This imposing and sophisticated coating has a distinctive touch, characteristic of noble metals. Its pieces exhibit a unique visual effect, which combines the beauty of oxidation, natural wear and luxurious shine, referring to gold and copper.

ETRUSCO

C O A T I N G

The Etruscans: a mysterious people who flourished in ancient Italy, leaving a legacy of art, architecture and culture that inspired us to create the acclaimed Etruscan Castelatto line. This line presents the effect of natural wear caused by the action of time on Greek and Italian marbles. Its singular and uneven texture transitions from rustic to contemporary, presenting a complete range for application on floors, walls, edges and accessories for swimming pools, outdoor and indoor areas.

RAMMED

COATING

Also known as "rammed earth", the compacted earth construction technique combines the natural beauty of the earth with the durability and strength of a solid wall. The reinterpretation of this classic in architectural concrete presents a simpler application compared to the original pounded earth technique, and carries with it a rich history and culture, expressed by its organic nuances in earthy tones.

NEW 25

POENTE

COATING

Poente is the celebration of the sunset, capturing the subtle nuances and delicate movement of the sky at dusk. With a palette of colors that reflect the warm and soft tones of the horizon-golds, pinks and soft blues — this coating transforms the wall into a living canvas, evoking the magic and transition of natural lights. The beauty of twilight is thus transported into the environment, creating a unique and enveloping atmosphere.

DÓRICA

COATING

Inspired by the Doric columns of Ancient Greece, Doric revives the essence of Greek temples with a meticulous and sophisticated design. With precise calculations and symmetrical elements, it creates an impactful visual effect that enhances the proportion and harmony of the space. The detail-rich repetitions and fluting add depth and complexity to the design, evoking the grandeur and beauty of classical architecture.

CASTELATTO FLOORING COMPATIBILITY CHART
FOR ELEVATED SYSTEM

LINE	FINISHING	COLORS	FORMAT
Urbe	Natural / Milled	All	40 X 20 cm / 20 x 20 cm
Granitte	Milled	All	60 X 60 cm
Matéria	Milled	All	60 X 60 cm
Grezzo	Sandblasting	All	60 X 60 cm
Madeyra Vecchia	-----	All	60 X 60 cm
Roccia	Sandblasting	All	60 X 60 cm
Pacific	Milled	All	60 X 60 cm
Crystalli Modular	Sandblasting	All	60 X 60 cm

RAISED FLOOR

FEATURES

- 1. **Modular construction:** Composed of support plates and pedestals.
- 2. **Interlocking and lifting:** Allows the lifting of the plates and secure interlocking.
- 3. **Versatility:** Can be used indoors and outdoors.
- 4. **Varied heights:** From 7 cm to 200 cm of finished height.

BENEFITS

- 1. **Sustainability:** Made of 100% recycled thermoplastic.
- 2. **Safety:** Plate supported on 9 points and interlocked completely.
- 3. **Strength:** High mechanical strength and weight around 12 Kg/m².
- 4. **Compliance with standards:** Meets current standards.

APPLICATION

- 1. **High traffic areas:** Ideal for areas with a large flow of people.
- 2. **Varied projects:** It can be used in different types of projects.

The raised floor system is an innovative and efficient solution for projects that require sustainability, safety and versatility!

Format: 60 x 60 cm

Set on Raised
Subfloor

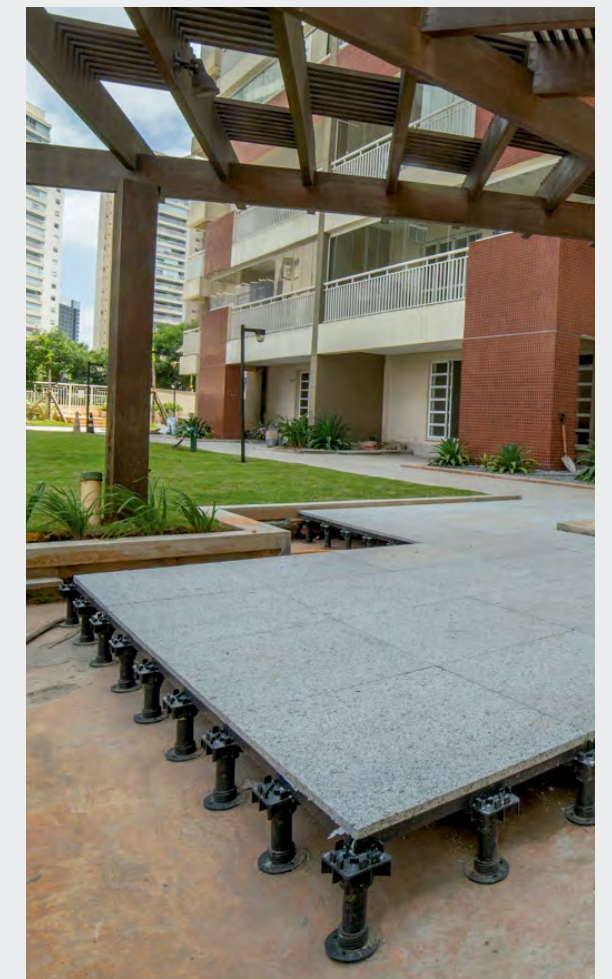

RAISED FLOOR

The unique mechanical interlocking system between plates ensures total stability to the system and guarantees uniform joints between plates for a much longer period, in addition to being safer by having a plate structured in recycled thermoplastic on which the coating is adhered.

The main function of the raised floor in internal areas is to provide flexibility to the infrastructure necessary for the operation of modern offices, ensuring long life applied and ease in handling for changes in layout and infrastructure update.

When applied in outdoor areas, the raised floor is a constructive solution that has a fundamental role in architectural projects and landscaping, making the leveling between various elements built above the slab, such as gardens, swimming pools, inverted beams and level differences inherent to the projects. In addition, it provides drainage of rainwater between the joints of the plates, allowing the surface to be completely level and without apparent drains.

With the ability to reach heights up to 200 cm in total safety, the system has proven resistance through reports and tests, meeting all current standards.

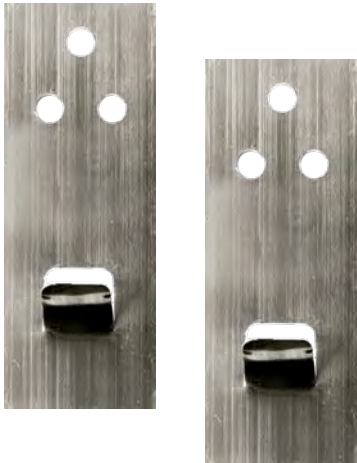

APPARENTE
CINZA

MECHANICAL FASTENING AND LAYING AT GREAT HEIGHTS

For laying on walls exceeding 3 meters in height, it is necessary to use metal inserts for more safety and compliance with the established standard NBR15846.

Metal Insert

 **YouTube**
Scan the QR Code and watch the our video lessons on YouTube about laying, grouting, cleaning and waterproofing.

Scan the QR Code to access our settlement manuals by product line.

STEP BY STEP

01.

Mark the back of the part at the correct height;
02.

Create the 45° angle with the base of the marble saw and perform the cut in such a way as to ensure a light and sufficient cavity to fit the metal insert;
03.

Fit the metal insert into the cut made and apply the ACIII mortar with double bonding to the back of the piece, including over the insert to ensure it sticks to the piece;
04.

Carry out the installation along with the insert and then drill the wall using the 3 holes of the insert;

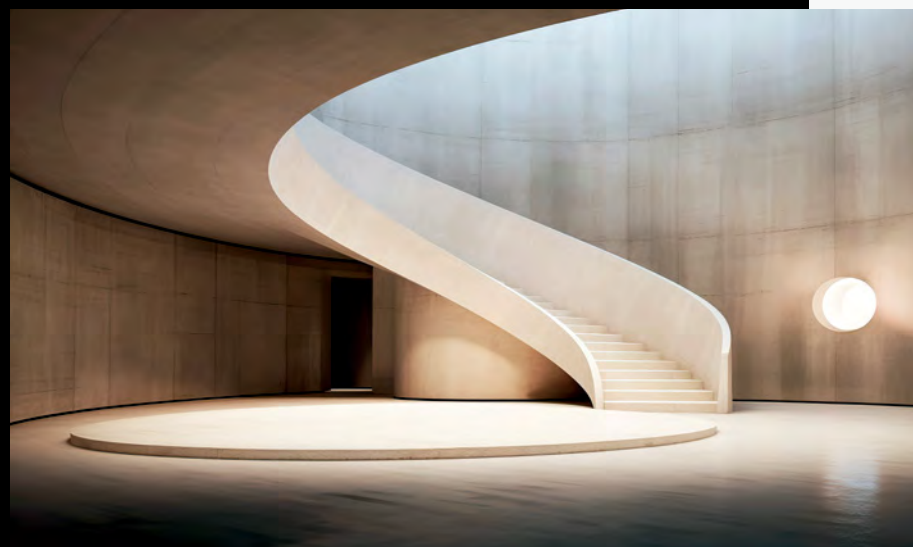

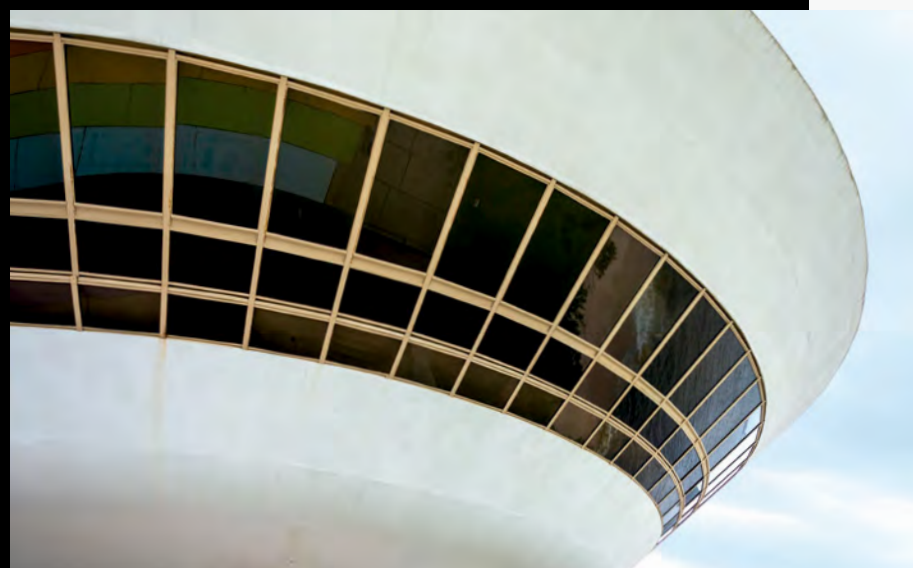

* For drywall walls, the insert must always be fixed to the studs (internal metal structure).
05.

Fix the wall plug in place and tighten the screw. We recommend the use of universal wall plugs starting from 6 mm.

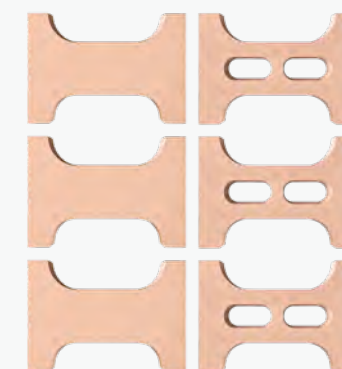

Repeat the step-by-step process above for all cladding pieces over 3 meters.

NEXUS LINE

A contemporary look at Dexco brands, paying homage to **modernism.**

CASTELATTO NEX BLOC

NEX BLOC PANEL
CLASSIC COLLECTION / NEXUS
24 X 35 X 2,5 CM
COLOR: CANELA

With its eyes on the present and the future, DEXCO presents a portfolio that combines perennality and adaptability, connecting trends in colors, textures, shapes and design. The launch Cross 2025 with products from the brands Deca, Portinari, Duratex, Castelatto and Ceusa, is a joint creation between the Dexco brands that explores the principles of harmonization of Dexmood and a unique concept to integrate tradition and innovation, rescuing creative freedom, Brazilian language and sustainability.

Inspired by modernist architecture, with strong reference to the national set, the Nexus line honors the timeless design that transforms the simple into iconic. The name "Nexus", which means connection, reflects the purpose of this collection: to unite renowned brands in an integrated proposal, where materials, shapes and textures dialogue harmoniously.

Castelatto brings this connection masterfully, offering textures and shapes that elevate the sensory experience with the Nex Bloc. The mix of materials and the sophisticated use of colors create functional and artistic pieces, evoking the avant-garde of architectural design.

The Nexus line is more than a collection of products, it is an invitation to explore the connections between the past and the present, the handmade and the industrial, the functional and the aesthetic. A celebration of modernism that transforms spaces and inspires generations
